Creación de repositorio en GitHub

Primero se creó una organización para tener los dos repositorios requeridos juntos:

The screenshot shows the GitHub organization page for "C4-COLDES-2021". The organization's profile picture is a pink pixelated cat. The navigation bar includes "Overview", "Repositories" (with a count of 2), "Packages", "People" (with a count of 5), "Teams", and "Projects". The "Repositories" section is active, displaying a list of repositories. The first repository is "gestor-proyecto", which is public and described as "Repositorio Ciclo 4 MisionTic 2021 - Desarrollo WEB". It has 0 stars, 4 forks, 0 issues, and 0 pull requests, and was updated 5 days ago. The second repository is "gestor-proyecto-api", also public, with a TypeScript language badge, 0 stars, 0 forks, 0 issues, and 0 pull requests, updated 10 days ago. A "View all repositories" link is at the bottom of the list. On the right, the "People" section shows five avatars, and the "Top languages" section shows TypeScript.

Y este es el repositorio principal:

The screenshot shows the GitHub repository page for "C4-COLDES-2021 / gestor-proyecto". The repository is public. The navigation bar includes "Code", "Issues", "Pull requests", "Actions", "Projects", "Wiki", "Security", and "Insights". The "Code" section is active, showing the "main" branch with 4 branches and 0 tags. There are buttons for "Go to file", "Add file", and "Code". The commit history shows a single commit by "jlcatalico" titled "Create README.TXT" 12 days ago, with a commit hash of 077204f and 1 commit. The file "README.TXT" is listed, created 12 days ago. The content of the README.TXT file is displayed, showing the text "Repositorio Clico 4 Mintic". On the right, the "About" section describes the repository as "Repositorio Ciclo 4 MisionTic 2021 - Desarrollo WEB". The "Releases" section shows "No releases published", and the "Packages" section shows "No packages published".

Se les dio acceso a todos los integrantes del grupo y creó la rama presentación. Luego cada integrante clonó el repositorio, hizo pull y agregó su presentación:
